Beyond the Rainbow Foundation is the first non-profit public interest foundation made to gather the strength of LGBTQIA individuals as well as their family members, friends, and neighbors.

2013. 1

We began our establishment as an organization in January of 2013 to stand together with a mother, her transgender child, and human right activists.

2014. 1

In January of 2013, with the help of 343 supporters we gathered 100,000,000 won (around 100,000 dollars), established as an organization, and began our activities in earnest.

We have continued to implement a wide variety of projects supporting human rights activities and activists.

However, the Department of Justice has not allowed permission for us to legally establish because we are fighting for the human rights of LGBT individuals.

Beyond the Rainbow Foundation will fight until the end against this clear discrimination on the side of the government.

If you are curious about the activities of our organization, please visit our homepage.

We ask for your support of Beyond the Rainbow Foundation.
