KWEM

(Korean Women's Environmental Network)

Healthy Environmental Education
Slow Life Campaign
Grass-root networks for women
Ecofeminism School

Korean Women's Environmental Network is network for women involving Environmental movement. It is knitting the net for women who practice the philosophies of ecology in a soft but strong manner.

KWEN is giving a serious concern of **how toxic chemicals affect** the health of children and women so providing various educational programs. In addition, It suggests **slow and simple life style** against the fast moving oil-dependent way which puts the convenience and efficiency first. ♻️

YWCA of Korea

signs up **100,000** citizens
'No-Nuke Fire Tuesday' 90 times
Shut down 'Gori-1' nuclear power

YWCA of Korea has developed movements in various areas such as Women, Environment, Peaceful unification in Korea with title of 'Wind of Life, Reviver of the World'.

Recently, it is giving priority to the movement of energy transfer with 'No-Nuke' slogan and taking part in counteracting the issue of Climate Change. Since 2014, it has conducted the campaign called 'No-Nuke Fire Tuesday' in the street for 90 times so far and it contributed significantly to determination of shutting down the decrepit 'Gori-1' nuclear power which is run for 40 years in Busan.

Women in Miryang

Struggle for **10** years
Stop the **765kV Transmission Tower**
against violent Energy System

In a small city in Korea called Miryang, elderly in their 70's and 80's are fighting against the construction of extra-high voltage (765kV) Transmission towers which threaten their livelihood and safety. This towers are being implemented by Korea Electric Power Corporation (KEPCO) to transmit electricity produced at the Shingori Nuclear Complex to the city area.

Most of them are old women and have been struggling for 10 long years under the slogans "We do not want this land leave to our descendants polluted with nuclear development and high voltage transmission lines"

Sisters Garden

16 small farm communities
Connect the farmer to the consumer
Saving **native seeds**

Sistersgarden is the organization for women farmers with the belief that sustainable agriculture by small farmers can make the earth cool down from climate change. They are running the **campaign for Food Sovereignty** which connects the farmer to the consumer. 16 small farm communities in Korea are joining now.

In addition, it is educating the value of 'Agroecology' questioning the structure of capitalistic society as well as agricultural technology not using pesticide, chemical fertilizer. Also Sistersgarden is active on the movement for saving native seeds with women farmers.
