Conference for Women and Tourism: Crossing Women's Time and Space

Many women can be seen to travel across regions and borders in this age of continuous cultural exchange and travel. With the expansion of Korean culture, the travels of women vivaciously embrace diverse cultural exchanges. At this point of increasing interest towards women's travels and the travel industry, we are concerned about the continuously emerging new dimensions of travels.

The late poet Goh Jung Hee had not only been a woman poet, but also an early member of 'Alternative Culture, Inc.' Based on the commemoration trips to her birthplace, 'Alternative Culture, Inc.' has hosted the 'Workshop to Develop Women's Culture's Tour Sites' since 2004. The workshop started out from the original desire to plan and develop travels for women, which distinguish themselves from 'sightseeing products.' They should rather be 'sightseeing creations,' which help rediscover tourist sites as places where the region and the traveler's stories can intermingle.

In an effort to increase the potential of this project for women's travel and sightseeing creations, the organization has planned the international symposium 'Conference for Women and Tourism: Crossing Women's Time and Space' in 2005. We have therefore invited Korean tourism scholars, travel researchers and women, as well as researchers and specialists on the development of women's travels from abroad. With this diversity of scholars and specialists we anticipate an international projection and alternative to existing women's travels.

At this point I would like to express my gratitude to the sponsor of this event, the Korean Ministry for Culture and Tourism. I sincerely hope that this symposium will become the place to search and find alternative women's travels policies through case studies crossing time and space.
