Building a strong house for women

Women's Policy Research and Development

Since the implementation of the Beijing Platform for Action (1995), the idea of 'gender equality,' beyond women's issue, is expanded to the equal participation of women and men fulfilling the premise of sustainable development. Recent increase of women's participation in various sectors of Korean society represents the social changes toward a more equal society.

Seoul Women's Foundation promotes expansion of women's social participation by conducting researches on Women's Policy Development and Evaluation, Gender Analysis, and Gender Segregated Statistics of Seoul City.

We promote gender equality in Seoul City

Enhancing Gender Awareness and Empowering Women

Seoul Women's Foundation promotes gender equal culture and consciousness by supporting women's equal participation in overall social sectors of Seoul City.

We provide educations on gender equality consciousness raising for Seoul City Government officials and related institution workers so as to ameliorate gender stereotypes in the public sphere.
