For the same reason, we are not able to determine the possibility of forming the β -phase. The β -phase is a partially ordered state, whereas the α -phase is a disordered phase. The β -phase is derived from the α -phase by ordering of the polymer dipoles in certain directions. In principle, the types of β -phase are β_1 , β_2 , β_3 , and β_4 .

$\Delta \text{H}_{\text{f}}^{\circ}(\text{kJ mol}^{-1})$

1. *Phragmites australis* (Cav.) Trin. ex Steud.

1. The first step is to identify the problem.

2. The second step is to define the problem.

3. The third step is to analyze the problem.

4. The fourth step is to develop a solution.

5. The fifth step is to implement the solution.

6. The sixth step is to evaluate the solution.

7. The seventh step is to monitor the solution.

8. The eighth step is to report the results.
